Revolutionize Your Health

Why Personalized Care, Why Now?

Simply put, the current US healthcare model is broken. Today's Healthcare system focuses on disease management rather than wellness management. Decreased payments for medical services and mounting paperwork are keeping quality physicians from spending enough time with patients. Primary care medicine is no longer based on the one-on-one relationship between physician and patient, but has devolved into an impersonal system in which patients are seen by anonymous medical providers.

Therefore, patients are taking a serious interest in proactively managing their own health by changing their focus from visiting the doctor only when they are ill, to working with their doctor to stay healthy.

Dr. Emmer

is committed to each and every one of his members.

Dr. Michael Emmer began his education at Brooklyn College in Brooklyn, New York, where he earned his bachelor's degree in chemistry. He then attended New York University School of Medicine in New York City for his medical doctorate. After his medical studies, Dr. Emmer completed his internship and residency at the Hospital of the University of Pennsylvania in Philadelphia. Dr. Emmer then completed a competitive fellowship in endocrinology at the National Institutes of Health in Bethesda, MD. He is a member of the Alpha Omega Alpha Medical Honor Society, the premier honors society for medical professionals.

Dr. Emmer is board-certified in endocrinology and internal medicine. He has been in practice for more than 40 years and dedicates himself to one-on-one patient care with a focus on finding the best medical treatment options for every individual. Dr. Emmer has been in private practice in Bethesda since 1970.
